Our 17 year history assures best practice in privacy, security and the ethical use of data

We all have a responsibility to use data for good

Privacy

- We have built our business based on privacy by design principles for the past 17 years
- Quantum has strict protocols around the receipt and storage of personal information
- All information is de-identified using an irreversible tokenisation process with no ability to re-identify individuals.

Security

- We are ISO27001 certified - internationally recognised for our ability to uphold best practice standards across information security
- We use 'bank grade' security to store and process our data
- Comply with 200+ security requirements from NAB, Woolworths and other data partners
- All partner data is held in separate restricted environments
- All access to partner data is limited to essential staff only
- Security environment and processes regularly audited by our data partners.

Ethical use of data

Applies to all facets of our work, from the initiatives we take on, the information we use and how our solutions impact individuals, organisations and society.

Quantum believes in using data for progress, with great care and responsibility. As such please respect the commercial in confidence nature of this document.

Executive summary

01

Task 1

1. Increase visibility of brands like Tyrrells and Twisties in high-traffic areas frequently visited by young singles and couples.
2. Place impulse-oriented products near checkout or discretionary sections to encourage additional purchases.
3. Focus promotional strategies on high-contributing customer segments while maintaining engagement with family-oriented buyers who contribute through higher purchase volumes.

02

Task 2

1. Expand the new layout to stores with customer profiles similar to Stores 77 and 88.
2. Investigate basket size and pricing behavior in Store 86.
3. Continue monitoring post-trial performance for long-term sustainability.

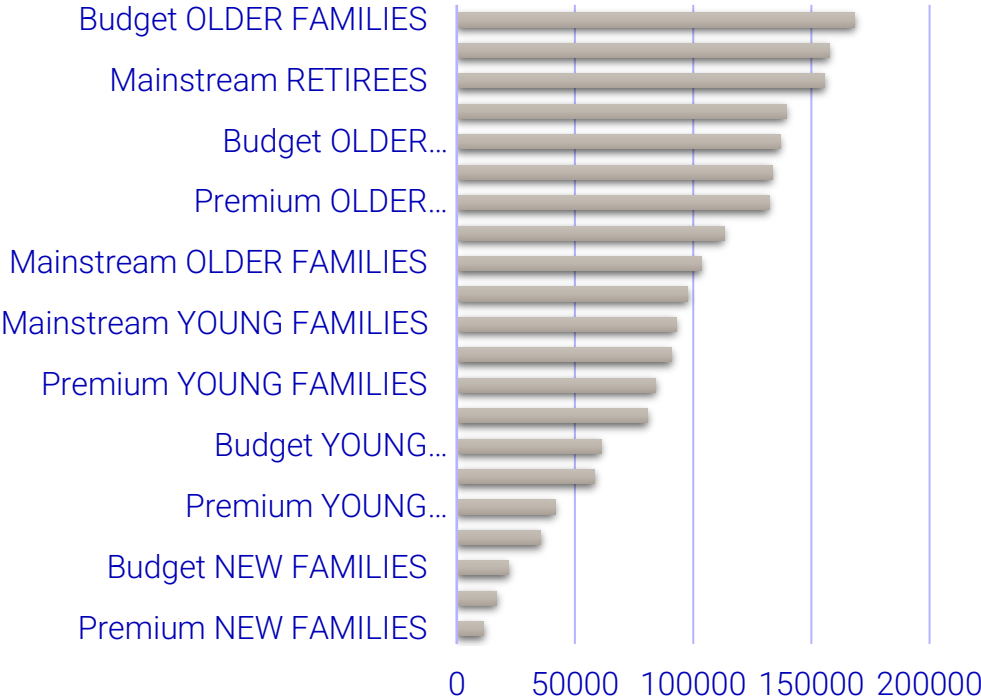

01

Category

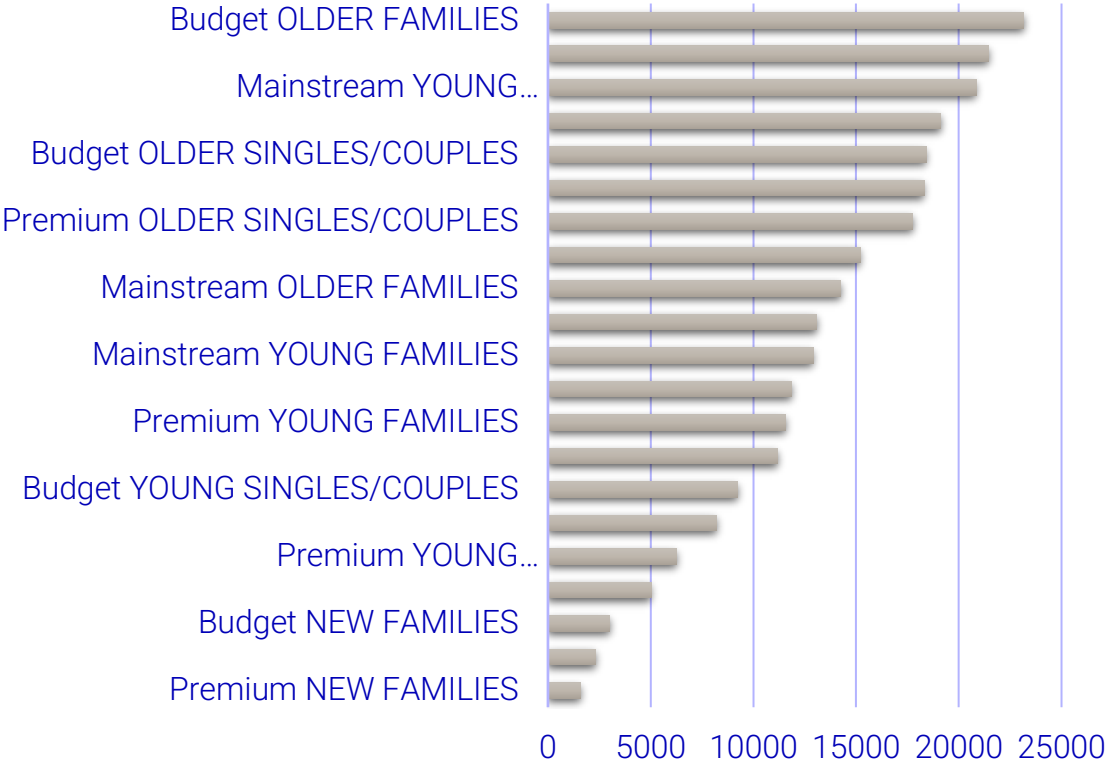

Overview: your key callout for the category should be included here

Sales are coming mainly from Budget - older families, Mainstream - young singles/couples, and Mainstream – retirees
There are more Mainstream - young singles/couples and Mainstream - retirees who buy chips.
This contributes to there being more sales to these customer segments but this is not a major driver for the Budget - Older families segment.

Total Sales by Segments

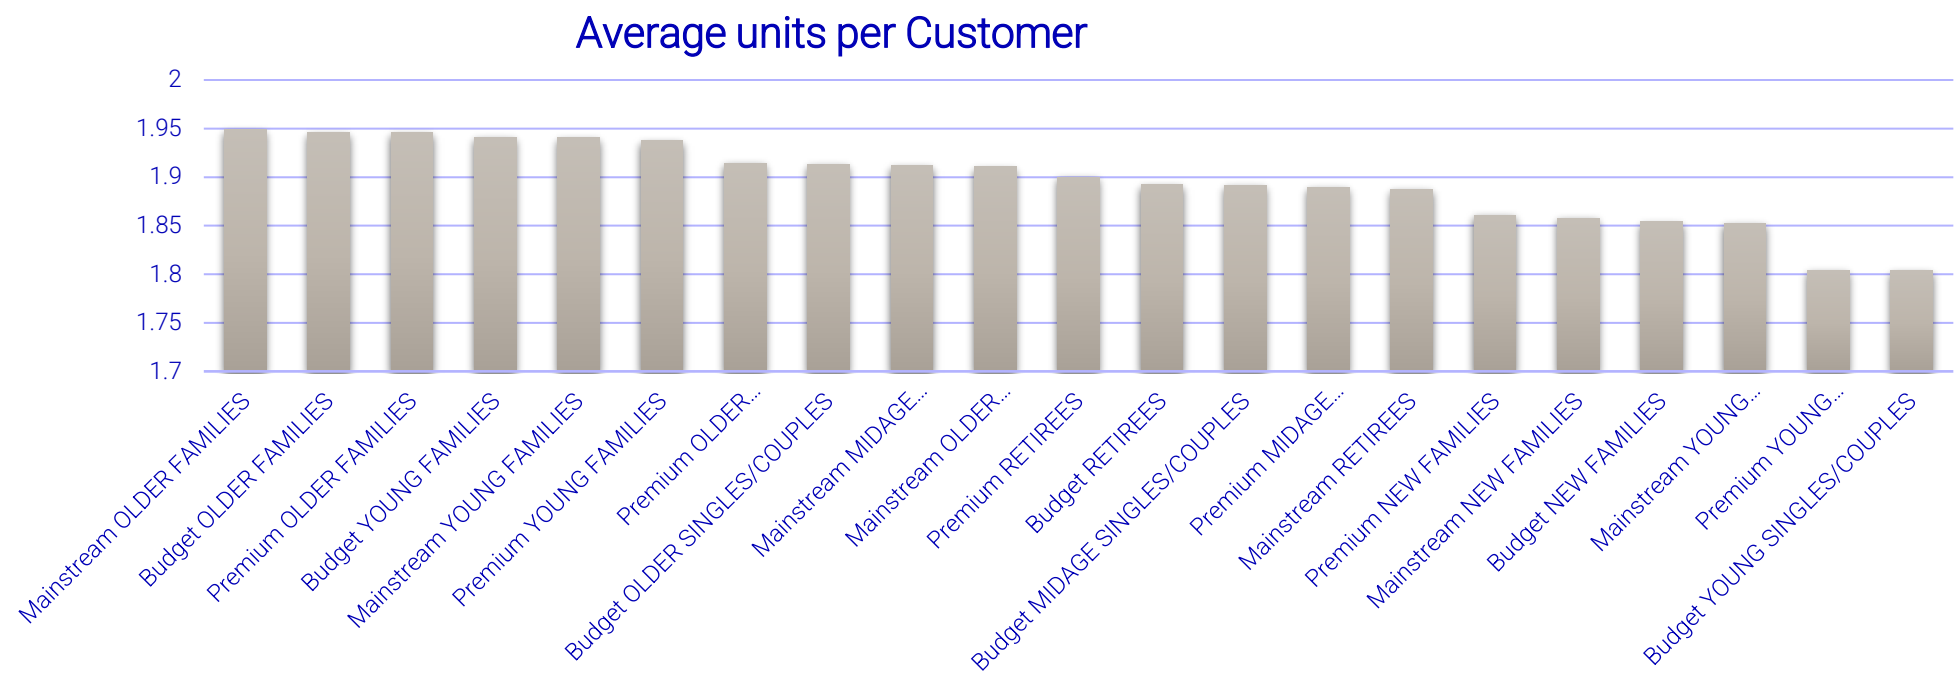

Number of Customers by Segments

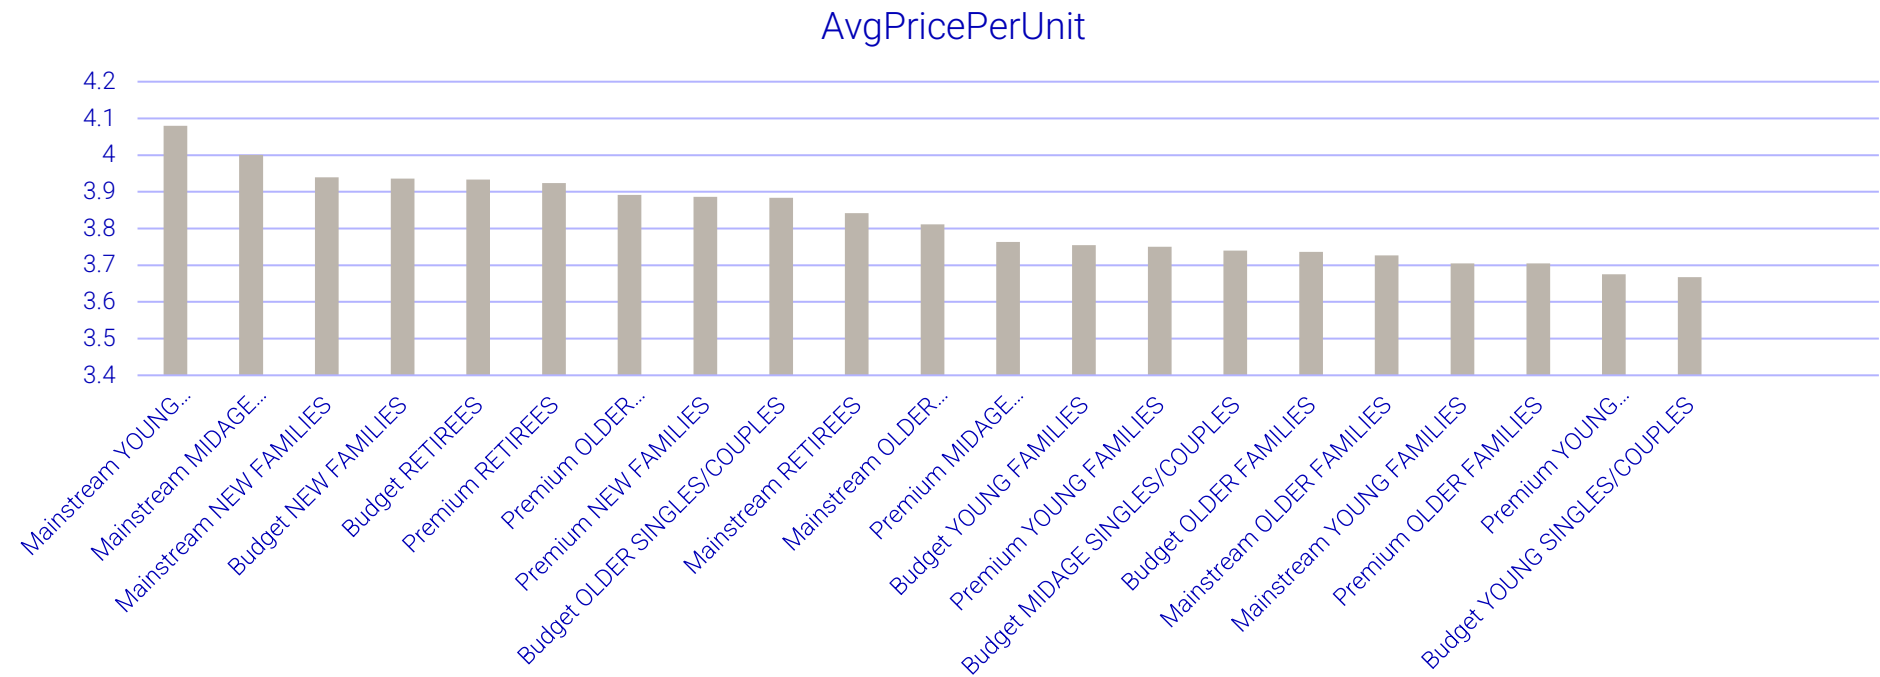

Average Units per Customer by Segment

Older families and young families in general buy more chips per customer

Average Price Per Customer by Segment

- 1. Mainstream mid-age and young singles and couples are more willing to pay more per packet of chips compared to their budget and premium counterparts.
- 2. This may be due to premium shoppers being more likely to buy healthy snacks and when they buy chips, this is mainly for entertainment purposes rather than their own consumption.
- 3. This is also supported by there being fewer premium mid-age and young singles and couples buying chips compared to their mainstream counterparts.

This slide will be commentary on affluence and its effect on consumer buying for the category of chips

Brand affluence:

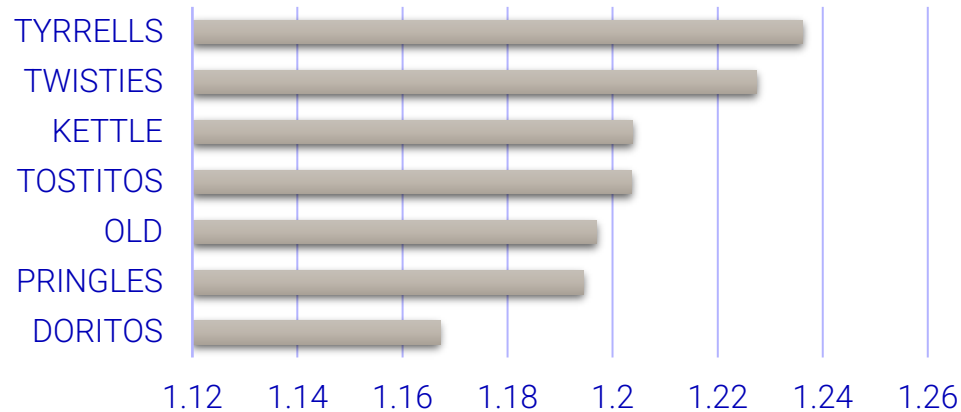

- Mainstream young singles/couples are 23% more likely to purchase Tyrrells chips compared to the rest of the population
- Mainstream young singles/couples are 56% less likely to purchase Burger Rings compared to the rest of the population

Pack Size affluence:

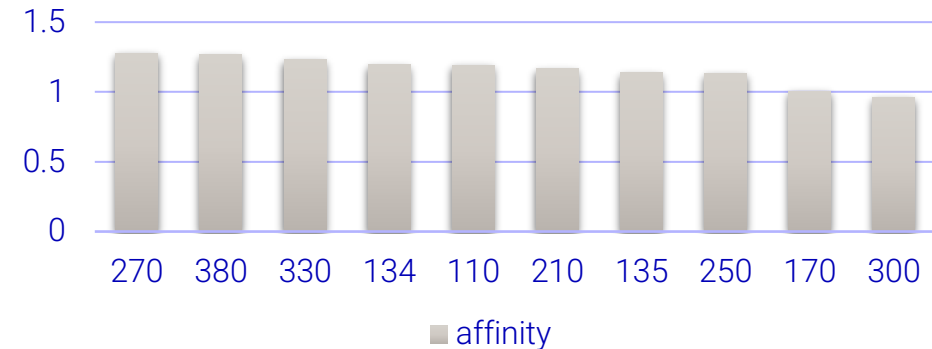

- It looks like Mainstream young singles/couples are 27% more likely to purchase a 270g pack of chips compared to the rest of the population but let's dive into what brands sell this pack size.
- Twisties are the only brand offering 270g packs and so this may instead be reflecting a higher likelihood of purchasing Twisties.

Stretch: Try visualising the proportion of customers by affluence and life stage on this slide

Brand affinity of Mainstream Young Singles/Couples

PackSize affinity of Mainstream Young Singles/Couples

1. Mainstream young singles/couples are 23% more likely to purchase Tyrrells chips compared to the rest of the population
2. Mainstream young singles/couples are 56% less likely to purchase Burger Rings compared to the rest of the population
3. It looks like Mainstream young singles/couples are 27% more likely to purchase a 270g pack of chips compared to the rest of the population but let's dive into what brands sell this pack size.
4. Twisties are the only brand offering 270g packs and so this may instead be reflecting a higher likelihood of purchasing Twisties.

02

Trial store performance

Explanation of the control store vs other stores

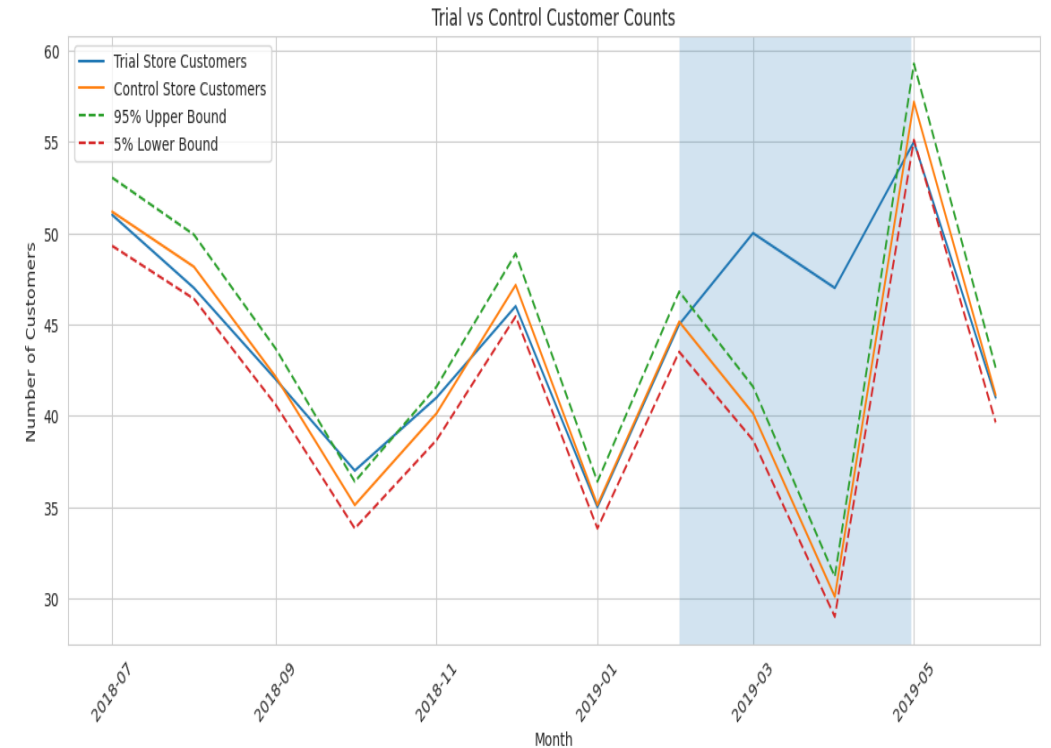

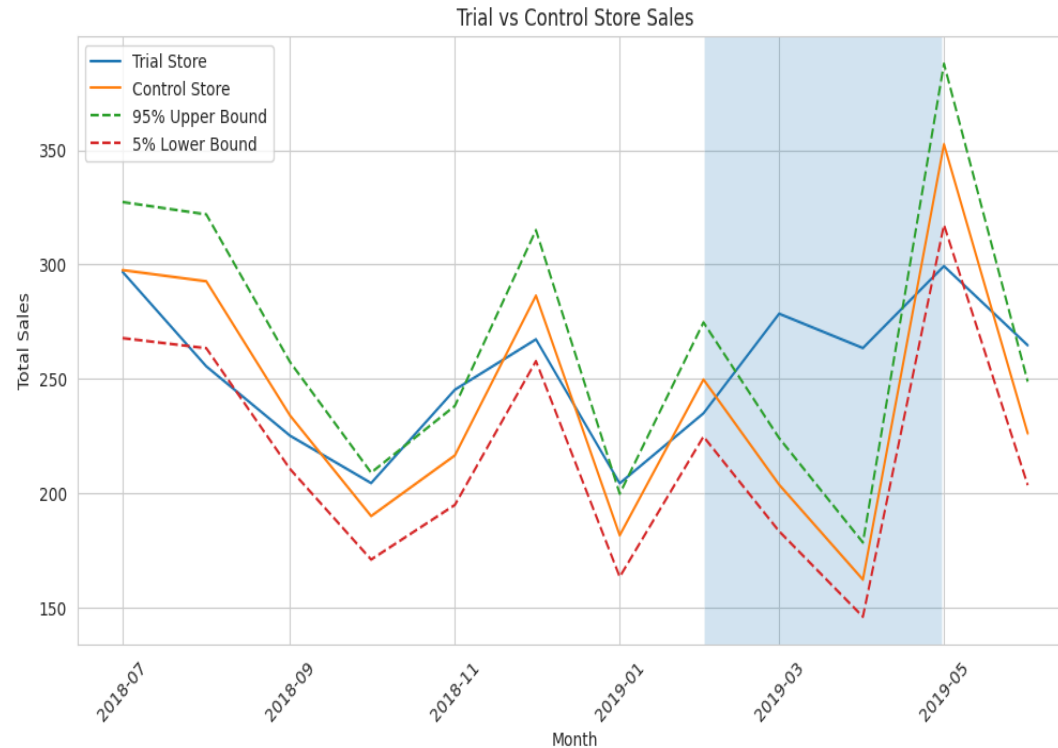

Trial Store	Matched Control Store
77	233
86	155
83	237

Call out of the performance in the trial store, determining if it was successful

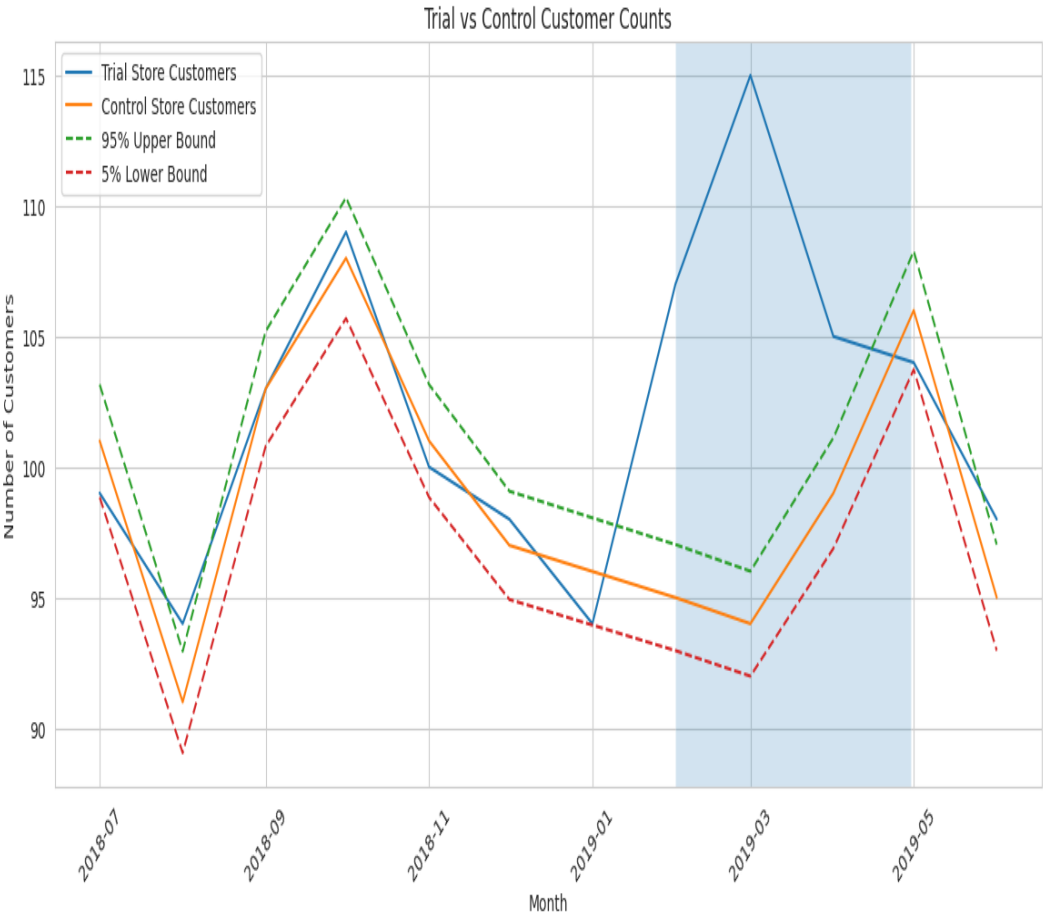

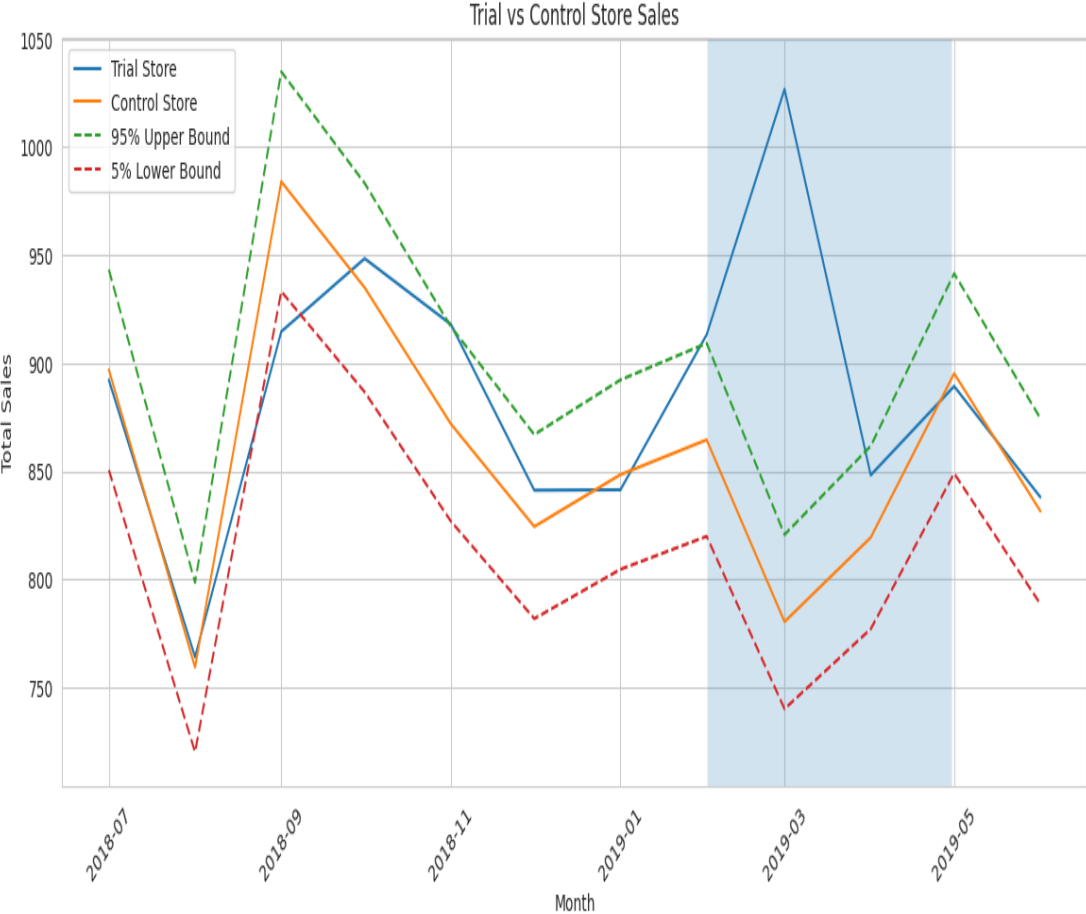

Sore 77 Results:

Store 77 demonstrated statistically significant uplift during the trial period, exceeding expected confidence intervals.

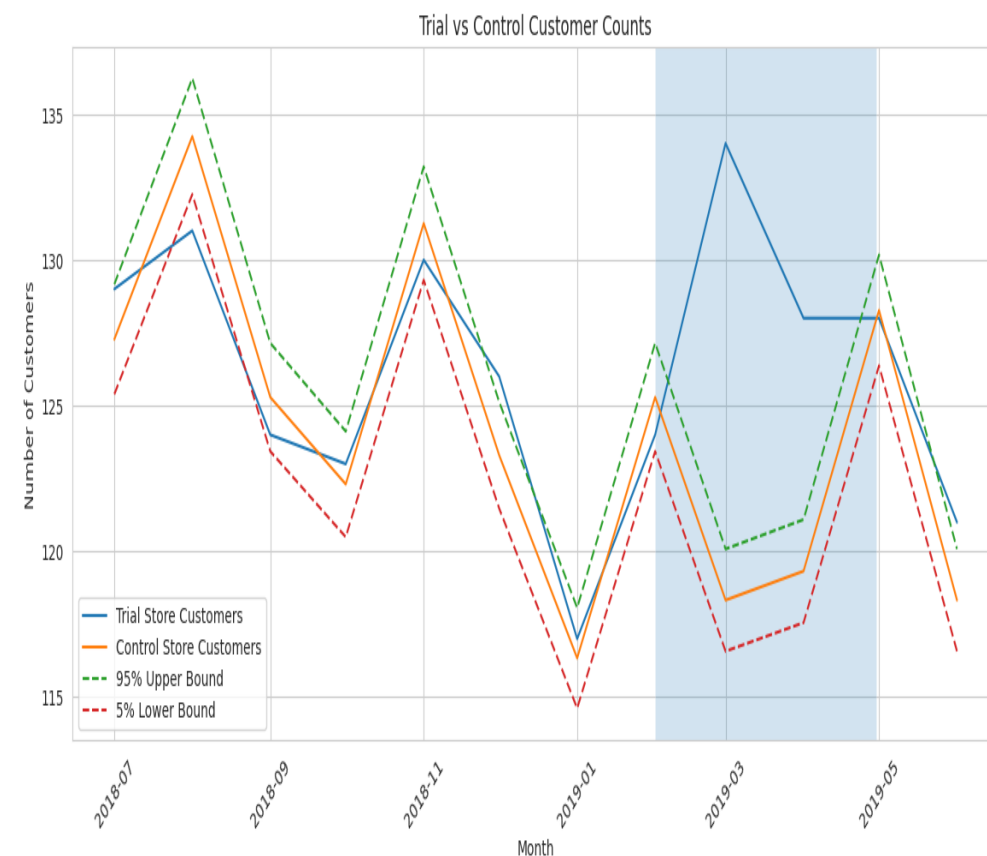

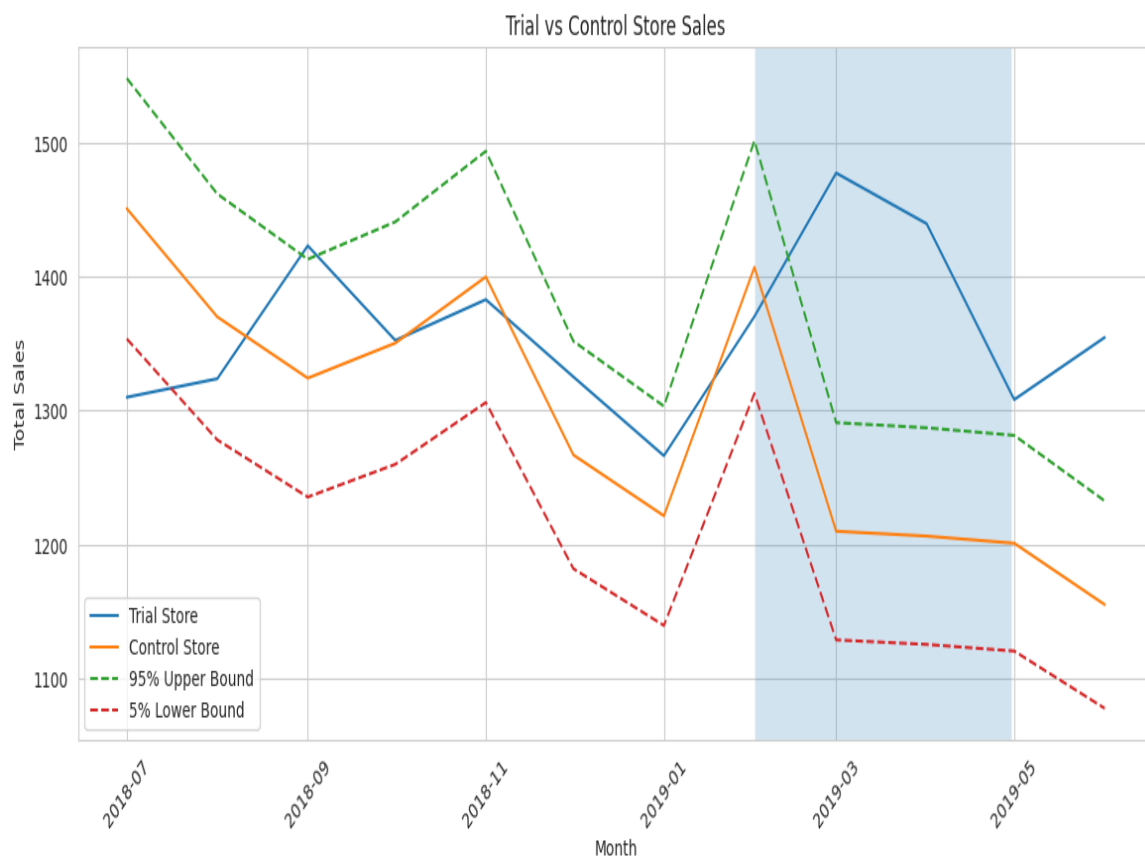

Store 86 Results

Store 86 showed increased customer traffic; however, sales uplift was less consistent than other trial stores.

Store 88 Results

Store 88 experienced strong and sustained uplift in both sales and customer counts during the trial period.
